INDEX TO VOLUME XLVIII.*

A

Academy of Sciences, National, meeting at New Haven, 513.
Adams, F. D., nepheline syenite in Ontario, 10.
Alternating currents, resonance analysis, Pupin, 379, 473.
Alum crystals, anomalies in the growth, Miers, 350.
Arsenic acid, Gooch and Phelps, 216.
Association, American, Brooklyn meeting, 352.
British, Oxford meeting, 351.
Astronomical spectroscopy, translation, Frost, 257.
Atmosphere, new gaseous constituent, Rayleigh, 345.

B

Ballard, H. O., fossil shells in the drumlins of the Boston Basin, 486.
Barker, G. F., chemical abstracts, 65, 257, 345, 421, 503.
Barton, G. H., channels on drumlins, 349.
Barus, C., spiral goniometry, 1; status of high temperature research, 332; telephonic measurement of electromotive force, 346; chronograph pendulum, 396; colloidal silver, 451.
Becker, G. F., astronomical conditions favorable to glaciation, 95.
Bigelow, F. H., inversions of temperatures in solar magnetic period, 435.
Bismuth, resistance in strong magnetic fields, Henderson, 427.
Bitumens, origin, Peckham, 389.
Bonney, T. G., Story of our Planet, 430.
BOTANY—
Atmosphere, constitution, Phipson, 431.
Flora of Mt. Desert, Rand and Redfield, 431.
Grafting, Daniel, 512.
India, vegetable resources, Watts, 511.
Inflorescence in descriptive, Hy, 513.
Lichens found in Britain, Crombie, 77.
Muscineæ, respiration, Jönsson, 431.
Sowerby's models of British Fungi in the British Museum, 76.
Terebinthaceæ, Jadin, 513.

C

California bitumen, nitrogen content, Peckham, 250.
Call, R. E., distribution of North American Viviparidæ, 132.
Campbell, G. F., cæsium-cobalt and cæsium-nickel, etc., 418.
Campbell, M. R., Tertiary changes in the drainage of Virginia, 21.
Carnegie, D., Law and Theory in Chemistry, 257.
Chemical analysis, Crookes, 425.
Chemistry, law and theory, Carnegie, 257.
CHEMISTRY—
Alkaline perchlorates, detection, Gooch and Kreider, 38.
Analytical, Ostwald, 345.
Antimony and bismuth alloys, thermo-electric heights, Hutchins, 226.
Arsenic in copper, estimation of minute quantities, Gooch and Moseley, 292.
Calcium, barium and strontium, carbides, Moissan, 506.
Carbon boride, Moissan, 505.
Cæsium-cobalt and cæsium-nickel, etc., Campbell, 418.
Cæsium, rubidium, etc., double chlorides and bromides, Walden, 283.
Chemical change, influence of moisture, Baker, 422.
Chloride of mercury batteries, Fitch, 434.
Chlorine, Gooch and Kreider, 166.
Chromium, separation from iron and aluminium, Riggs, 409.
Copper crystals in "aventurine glass," Washington, 411.
Cyanogen, structure of the flame, Smithells and Dent, 424.
Diamond, production artificially, Moissan, 68.
Electrolysis by alternating currents, Hopkinson, Wilson, and Lydall, 66.
Elementary manual, Storer, 425.
Ferrous iron in silicates, Pratt, 149.
Free fluorine produced by chemical means, Brauner, 423.
Hydrogen peroxide in the atmosphere, Bach, 67.
International congress of applied, 80.

* This Index contains the general heads, BOTANY, CHEMISTRY, GEOLOGY, MINERALS, OBITUARY, ROCKS, and under each the titles of Articles referring thereto are mentioned.

CHEMISTRY—
Iodic acid, action of reducing agents on, Roberts, 151.
Iodine bases, new, V. Meyer and Hartmann, 503.
Lummer-Brodhum prism in colorimetry, Krüss, 66.
Mercurous chloride, size of the molecule, V. Meyer and Harris, 506.
Molecular mass, titration method for determining, Küster, 65.
Nitrogen, anomaly in the density, Rayleigh, 504.
Nitrogen, explosive haloid compounds, Seliwanow, 67.
Phosphorus, preparation by the action of aluminium upon the phosphates, Rossel and Frank, 68.
Platinochlorides and platinum subchlorides, Lea, 397.
Potassium permanganate in iron analysis, Roberts, 290.
Soda in hornblende, Lane, 172.
Telluric acid, iodometric method for the estimation, Gooch and Howland, 375.
Clarke, F. W., anorthite and epidote, 429; zeolites, 187.
Clarke, J. M., study of the brachiopoda, 71.
Coleman, A. P., Antholite, Elzivir, Ontario, 281.
Cordoba Durchmusterung atlas, 432.
Crombie, J. M., lichens found in Britain, 77.
Crosby, W. O, fossil shells in the drumlins of the Boston basin, 486.
Crookes, W., select methods of chemical analysis, 425.

D

Dall, W. H., Miocene and Pliocene of Martha's Vineyard, 296.
Davison, C., Leicester earthquake of Aug. 4, 1893, 78.
Des Cloiseaux, A., Manuel de Mineralogie, 75.
Dielectric bodies, Le Graetz and Fomm, 428.
Dodge, F. S., condition of Kilauea, 78.

E

Earth, mean density, Poynting, 507.
Eclipses of the sun, total, Todd, 76.
Electric conductivity of gases, Braun, 421.
Electric oscillation, luminous effects, Ebert, 427.
Electrical condition of the air in high altitudes, 69.
Electrical conductivity of absolutely pure water 509.
Electrical resistance, measurement, Price, 425.
Electrical waves on iron wires, Trowbridge, 307.
Electricity on iron wires, wave lengths, St. John, 311.
Electricity, source of friction, Christiansen, 508.

F

Feldspaths dans les plaques minces, Lévy, 173.
Foerste, A. F., Eocene and Miocene of Georgia and Florida, 41.
Frost, E. B, treatise on astronomical spectroscopy, translation, 257.

G

Geologic atlas of the U. S., Powell, 170.
Geological International Congress, 79, 433.
Geological Report and Survey, United States, 70.
Geological Society of America, Brooklyn meeting, 348.
GEOLOGY—
Auriferous conglomerate from the Sierra Nevada, Lindgren, 275.
Bird from New Jersey, gigantic, Marsh, 344.
Brachiopoda, introduction to the study, Hall and Clark, 71.
Carboniferous fossils, Norfolk Co. basin, Woodworth, 145.
Carboniferous strata of Shasta Co., Calif., Smith, 300.
Channels on drumlins, Barton, 349.
Cherts of Missouri, Hovey, 401.
Coal measures of Kansas, footprints, Marsh, 81.
Cuba, tertiary and later history, Hill, 196.
Eocene and Miocene of Georgia and Florida, Foerste, 41.
Fauna of the St John group, No. VIII, Matthew, 72.
Fossil shells in the drumlins of the Boston basin, Crosby and Ballard, 486.
Gabbros in the Adirondack region, Smyth, 54.
Glacial geology of Great Britain, Lewis, 73.
Glaciation, astronomical conditions favorable to, Becker, 95.
Glaciation, effect on the present fauna of N. A., Scudder, 179.

GEOLOGY—
Manganese beds o Arkansas, age, Williams. 325.
Miocene artiodactyles, Marsh. 175.
Miocene and Pliocene of Martha's Vineyard, Dall. 296.
Miocene tapir, Marsh. 348.
Miohippus beds eastern. Marsh, 91.
Ornithopoda of the American Jurassic, Marsh, 85.
Pre-Olenellus fauna, Noetling, 509.
Resin, fossil. Smith, 73.
Silurian limestone in No. Michigan, Seaman. 173.
Tertiary artiodactyles, Marsh, 259.
Tertiary changes in the drainage of Virginia, Campbell. 21.
Thomson slates, stratigraphic position. Spurr, 159.
Trias and Jura of Shasta Co., Calif., Smith, 350.
Glaisher, J. W. L., collected mathematical papers of H. J. Smith, 432.
Goniometry, spiral, Barus, 1.
Gooch, F. A., detection of alkaline perchlorates, 38; chlorine, 166; reduction of arsenic acid, 216; minute quantities of arsenic in copper, 292; iodometric method for the estimation of telluric acid, 375.
Goodale, G. L., botanical abstracts, 431, 511.

H

Hall, J., study of the brachiopoda, 71.
Harkness W., solar system, 230.
Harrington, J. B., nepheline, sodalite and orthoclase from the nepheline syenite of Ontario, 16.
Hertz, H., collected work, vol. iii. 352.
Hill, R. T., tertiary and later history of the Island of Cuba, 196.
Hovey, E. O., cherts of Missouri. 401.
Howland, J., iodometric method for the estimation of telluric acid. 375.
Hurlburt, E. B., alunite. Ouray Co., Colorado. 130.
Hutchins, C. C., thermo-electric heights of antimony and bismuth alloys, 226.

I

India, vegetable resources of, 511.
Induction coils, interrupter for large, Wadsworth, 497.
Ingersoll, C. A., hemimorphic wulfenite crystals, 193.

K

Kilauea, Dodge, 78.
recent eruption, Thurston, 338.
Kreider, D. A., detection of alkaline perchlorates. 38; mineralogical notes, 141; chlorine, 166.
Kunz, G. F., new locality of true emeralds, 429.

L

Lane, A. C., relation of double refraction to soda in hornblende. 172.
Lea, M. C., solutions of metallic silver, 343; platinochlorides and platinum subchloride, 397.
Lectures and addresses, vol. ii, Thompson, 433.
Leicester earthquake of Aug. 4, 1893, Davison, 78.
Lévy, A. M., Feldspaths dans les plaques minces, 173.
Lewis, H. C., glacial geology of Great Britain. 73.
Lick Observatory of the Univ. of California, publications, 76.
Lindgren, W., auriferous conglomerate, from the Sierra Nevada, 275.

M

Marsh, O. C., footprints in the coal measures of Kansas, 81; Ornithopoda of the American Jurassic, 85; eastern Miohippus beds, 91; Miocene artiodactyles, 175; Tertiary artiodactyles 259; gigantic bird from New Jersey, 344; new Miocene tapir, 348.
Mathematical papers of H. J. Smith, collected. Glaisher, 432.
Matthew, G F., fauna of the St. John Group, No. VIII. 72.
Maxim's flying machine, 428.
Metallic silver. solutions, Lea, 343.
Miers, H. A., anomalies in the growth of alum crystals, 350.
Mineral Industry, Rothwell, 510.
Minerals, catalogue, English, 511.
Mineralogie, manuel de, Des Cloiseaux, 75.
MINERALS—
Albite, N. Carolina, 115. Alunite, Ouray Co., Colorado, 130. Anorthite, Maine, 429. Antholite, Elzivir, Ontario, 281.
Basilite, 75. Brewsterite, 190.
Calamine, 213. Cerussite, Montana, 212. Chabazite, 190. Chalcophanite, 141.

MINERALS—
Edingtonite, 189. Elfstorpite, Sweden, 74. Emeralds, Mitchell Co, N. C., 429. Epidote, Maine, 429. Epistilbite, 190.
Faujasite, 191. Foresite, 190. Frankeite, Bolivia, 75.
Gismondite, 189. Gmelinite, 190.
Harmotome, 189. Hewlandite, 190. Hydrofranklinite, N. J., 141. Hydronephelite, 190.
Knopite, Alnö, 74.
Lampeostibian, Sweden, 74. Laumontite, 190. Leadhillite, Missouri, 219. Levynite, 189.
Natrolite, 191. Nepheline, Ontario, 16. Nepheline syenite, Ontario, 10.
Octahedrite, Arkansas, 114. Offretite, 190. Oligoclase, N. Carolina, 115. Orthoclase, Ontario, 16.
Penfieldite, Greece, 114. Phillipsite, 189.
Rhodoarsenian, Sweden, 74. Rittingeaite, 75.
Scolecite, 190. Shloroarsenian, Sweden, 74. Sjögruvite, 75. Sodalite, Ontario, 16. Stilbite, 190.
Thomsonite, 189.
Wulfenite crystals, New Mexico, 193.
Zeolites, Clarke, 187.
Zircon, Ontario, 214.
Moseley, H. P., minute quantities of arsenic in copper, 292.

N

Niagara Falls, duration, Spencer, 455.
Nichols, E. L., physics and applied electricity, 346.
Nikitin, S., bibliothéque geologique de la Russie, 72.

O

OBITUARY—
Cooke, J. P., 353
Topley, Wm., 514.
Von Helmholtz, H. L. F., 354.
Williams, G. H., 174.
Ostwald, analytical chemistry, 345.

P

Peckham, S. F., nitrogen content of California bitumen, 250; origin of bitumens, 389.
Peirce, B. O., thermo electric properties of platinoid and manganine, 302.
Pendulum, chronograph, Barus, 396.
Penfield, S. L., determination of water, 30; mineralogical notes, 114, 141.
Phelps, I. K., reduction of arsenic acid, 216.
Physics and applied electricity, Nichols, 346.
general, Woollcombe, 429.
Pirsson, L. V., leadhillite, Missouri, 219.
Planet, story of our, Bonney, 430.
Platinoid and Manganine, thermo-electric properties, Peirce 302,
Powell, J. W., geologic atlas of the U. S., 170.
Pratt, J. H., ferrous iron in silicates, 149; mineralogical notes, 212.
Price, W. A., measurement of electrical resistance, 428.
Pupin, M. I., resonance analysis of alternating currents, 379, 473.

R

Ramsay's physical geology and geography of Great Britain, Woodward, 430.
Rand, E. L., flora of Mt. Desert, Me, 431.
Redfield, J. H., flora of Mt. Desert, Me., 431.
Ries, H., artificial crystals of zinc oxide, 256.
Riggs, R. B., separation of chromium from iron and aluminium, 409.
Roberts, C. F., action of reducing agents on iodic acid, 151; potassium permanganate in iron analysis, 290.
Russie, Bibliotheque Geologique, de la, Nikitin, 72.

S

Scott, W. B., variations and mutations, 3 5.
Scudder, S. H., effect of glaciation on the present fauna of N. A., 179.
Seaman, A. E., Silurian limestone in No Michigan, 173.
Self induction and capacity of coils, Fromme, 509.
